DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 11-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Craig (U.S. 4,122,847). Craig '847 discloses the invention as claimed. Craig teaches a protective covering 10 comprising a flexible pad 12 having a substantially planar surface with first and second sides, first and second ends 13,17, and adhesive 26 disposed on the first side (Figures 1 and 4). The embodiment of Figure 2 recites that the pad comprises a flexible, sponge-like material. Pad 12 is adapted for attachment to a forehead area of a user such that at least a portion of the adhesive member contacts the forehead of the user (col.2, lines 19-21). First and second flange extensions 14,15 (Figure 4) are monolithically formed with the pad and are disposed at, or adjacent to, the pad's first and second ends, respectively. The flange extensions include second and third adhesive members adhesive members 26, which are extensions of the central adhesive portion.

Response to Arguments

3. Applicant's arguments filed 12/2/02, with regard to claims 11-20, have been fully considered but they are not persuasive. Applicant argues that Craig fails to teach attaching the shield to a substantial portion of the user's forehead, including the area adjacent to where the

user's forehead meets the user's hairline. Claims 11-20 do not recite a method of attaching the shield/pad, only that the shield/pad is adapted for attachment to a substantial portion of a forehead area of a user, including adjacent to where the forehead area meets the user's hairline. Figure 4 shows the shield/pad disposed on a substantial portion of the wearer's forehead and depending upon the size of the wearer's face/forehead region, the pad could cover an area adjacent to where the forehead area meets the user's hairline.

Allowable Subject Matter

4. Claims 1-10 are allowed.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
